PROFESSIONAL SUMMARY

DevOps Engineer with 2 years of experience across AWS and Azure, focused on Kubernetes, Docker, CI/CD, Infrastructure as Code, cloud automation, observability, security, and production troubleshooting. Hands-on experience with Amazon EKS, EC2, ECR, RDS, S3, IAM, Secrets Manager, VPC, VPN, Jenkins, GitHub Actions, Helm, Argo CD, Prometheus, Grafana, Loki, Terraform, Ansible, Python, and Shell. Experienced in end-to-end deployment and operations of cloud-native applications, including containerized application services and platform components such as Keycloak, Weaviate, MongoDB, Redis, and PostgreSQL.

TECHNICAL SKILLS

Cloud Platforms: AWS (EKS, EC2, ECR, S3, RDS, IAM, Secrets Manager, CloudWatch, VPC, VPN), Azure, GCP, Akamai Cloud

Containers & Kubernetes: Docker, Kubernetes, Amazon EKS, AKS, Helm, Ingress, ALB, HPA, Secrets Store CSI Driver

CI/CD & GitOps: Jenkins, GitHub Actions, GitHub, GitLab, Argo CD, GitOps

Infrastructure as Code: Terraform, Ansible, ARM Templates

Observability: Prometheus, Grafana, Loki, Promtail, Node Exporter, cAdvisor, Sentry, Azure Monitor

Security & Identity: AWS IAM, OIDC, AWS Secrets Manager, Kubernetes Secrets, Trivy, SonarQube, Google Workspace SAML, Keycloak

Scripting & Automation: Python, Shell/Bash, YAML

Databases & Data: PostgreSQL, MongoDB, Redis, Weaviate

PROFESSIONAL EXPERIENCE

DevOps Engineer | Webknot Technologies, Bangalore | 06/2025 – Present

- Own end-to-end deployment, operations, troubleshooting, and automation of cloud-native applications across AWS and Kubernetes environments.
- Design and replicate Kubernetes infrastructure for production workloads, including Keycloak, Weaviate, MongoDB, Redis, PostgreSQL, and application services.
- Build and maintain CI/CD pipelines with Jenkins and GitHub Actions for Docker builds, Amazon ECR publishing, Kubernetes deployments, and rollout validation.
- Implement observability using Prometheus, Grafana, Loki, Promtail, Node Exporter, and cAdvisor for metrics, logs, dashboards, and production troubleshooting.
- Automate infrastructure and operational tasks with Terraform, Python, and Shell across AWS IAM, EFS, S3, RDS, VPC, and Secrets Manager.
- Support secure cloud operations using IAM/OIDC, Kubernetes Secrets, AWS Secrets Manager, container scanning, and least-privilege access patterns.

DevOps Intern | Webknot Technologies, Bangalore | 11/2024 – 05/2025

- Automated deployment workflows across AWS and Akamai Cloud using CI/CD tooling and containerized workloads.
- Integrated AWS Secrets with Kubernetes workloads to improve secret handling and reduce manual configuration.
- Troubleshot application and infrastructure incidents, documented resolutions, and supported high-availability deployments.

Technical Content Writer | Univo Education | 10/2024 – 11/2024

- Authored 50+ technical articles and guides focused on clear, practical technology communication.

DevOps Intern | Pearl Thoughts | 08/2024 – 10/2024

- Automated deployments using Jenkins, Docker, Terraform, and GitHub Actions, cutting release cycle time by 50%.
- Automated deployment of a Medusa e-commerce application on AWS using Terraform and GitHub Actions, with Docker delivery and Fargate Spot optimization.

SELECTED PROJECTS

Greenlight Recruitment – CareerConnect

- Supported the end-to-end DevOps lifecycle covering containerization, CI/CD, Kubernetes, cloud infrastructure, observability, and production troubleshooting.
- Implemented and operated Amazon EKS workloads with dedicated node groups, ingress, secrets, storage, autoscaling, and service-to-service connectivity.
- Built deployment automation for Docker images to Amazon ECR and Kubernetes rollout workflows using Jenkins and GitHub Actions.
- Implemented centralized monitoring and logging with Prometheus, Grafana, Loki, Promtail, Node Exporter, and cAdvisor.

AWS VPN Integration with Google Workspace SAML

- Implemented end-to-end AWS VPN integration with Google Workspace SAML authentication, enabling secure enterprise access.

101Gen.ai – Cloud-Native AI Platform

- Built 101Gen.ai on AWS, Kubernetes, EKS, and Docker, transforming a monolith into scalable microservices.
- Deployed Keycloak, Weaviate, MongoDB, Redis, PostgreSQL, and application workloads across the cloud-native platform.
- Implemented centralized error monitoring and automated operational tasks using Python and cloud-native tools.

Taxlabs – E-Invoicing Platform

- Built automated backend deployment pipelines with Jenkins and delivered frontend releases through static hosting and CDN.
- Implemented monitoring with Azure Monitor and Grafana, plus log backup and alerting workflows.

EDUCATION

Bachelor of Science (Hons.) – Computer Science | Ramanujan College, University of Delhi, India | 07/2024 | 7.9 CGPA

CERTIFICATIONS

- Confluent Fundamentals Accreditation (2024)
- Kubernetes Fundamentals – DataDog (2024)

- Terraform Basics – KodeKloud (2024)
- Certified Kubernetes Engineer – Webknot Technologies (2025)
